Pachuca, Mexico

Deadline for manuscript
submissions:

1 April 2025

Message from the Guest Editors

Dear Colleagues,

The Special Issue is associated with the following two Rabies In The Americas (RITA) international conferences: RITA XXXIV, which took place in Bogota, Colombia, in October 2023, and RITA XXXV, which will now be taking place in Buenos Aires, Argentina, from 3 to 8 November 2024. RITA is a conference that has been held every year since 1990 by the United States of America, Canada, and Mexico, and more recently by Brazil and Argentina, as well as other Latin American countries; it aims to connect researchers, national and local directors of programs, laboratory workers and all those in the Americas and in other parts of the world who are involved in the surveillance, prevention and control of rabies. RITA conferences are events strictly centered on all aspects of rabies research and provide excellent opportunities to focus on research topics in this area. Symposium participants are cordially invited to contribute their original research papers presented at these two RITA conferences to this Special Issue of *Viruses*. For further information, please visit the following website: [Rita 2024—Rabies In The Americas 2024 \(ritaconference.org\)](https://ritaconference.org).

Message from the Editor-in-Chief

Viruses (ISSN 1999-4915) is an open access journal which provides an advanced forum for studies of viruses. It publishes reviews, regular research papers, communications, conference reports and short notes. Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. There is no restriction on the length of the papers. The full experimental details must be provided so that the results can be reproduced. We also encourage the publication of timely reviews and commentaries on topics of interest to the virology community and feature highlights from the virology literature in the 'News and Views' section.

Electronic files or software regarding the full details of the calculation and experimental procedure, if unable to be published in a normal way, can be deposited as supplementary material.

Author Benefits

Open Access: free for readers, with **article processing charges (APC)** paid by authors or their institutions.

High Visibility: indexed within **Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, AGRIS, and other databases.**

Journal Rank: JCR - Q2 (*Virology*) / CiteScore - Q1 (Infectious Diseases)
